Safety light OPTI SIGN

- › Enhances Safety: Highly visible dynamic hazard warnings
- › Maintenance-Free: No peeling, fading, or repainting
- › Optional with up to 4 different safety projections
- › Heavy-Duty Durability: IP65-rated aluminum housing with cooling

In demanding industrial environments, relying on traditional painted floor markings is no longer enough. The OPTI SIGN virtual safety projector provides an innovative, high-visibility solution that projects crisp, illuminated warning signs directly onto the surface. By utilizing an automated projection system, it commands attention and dynamically alerts personnel to hazards, restricted zones, and moving equipment. Made for heavy duty areas, this rugged system ensures that your safety communication remains unmistakable, permanent, and highly effective.

Versatile Applications & Features:

- Ideal for displaying warning signs, marking hazard zones, pedestrian walkways, and restricted areas.
- Captures attention instantly with dynamic projections, keeping personnel alert in busy environments.
- Swap safety messages effortlessly without costly floor repainting or operational downtime.
- Supports 6 color variations: B/W, Grayscale, 1-Color, 2-Color, 3-Color, and Full Color.
- Flexible optics with a choice of SPOT (26°) or WIDE (53°) beam angles for perfectly sized projections.
